BRIGHAM STREET Expected Heated POLES ARRIVE

There Will Be Eighty-Four of Them.

Obstructions Will Be Cleared From the Middle of the Roadway.

Manager Campbell Hopes to Have the Wires Moved by the First of October.

New steel poles for Brigham street were received yesterday by the Utah Light and Railway company and the work of placing them in position will be commenced at once. Half of the poles are twenty four and the rest twenty-seven feet high The longer ones are for the lower side of the street and the others for the upper side. At present they are painted the regulation red, but Manager E. S. Campbell says that they will be painted an artistic olive green.

How They Will Look. How They Will Look.

Each pole is to be mounted on a concrete base sunk five feet below the pavement. They will be placed about 132 feet apart and it will take about eighty-four poles to cover the distance from State to Seventh East street. They are covered on each side with lattice work and will not be nearly so unsightly as the wooden poles now in use. The poles in the center of the street will be removed and the electric light wires transferred to the steel poles. The present plan is to carry the wires for residences down through the middle of the poles and the concrete bases and run them to residences along the street under ground.

Street to Be Cieared. Street to Be Cleared.

Street to Be Cleared.

The trolley wires will be supported by cross wires having a sag of but two feet, leaving the middle of the street absolutely unobstructed. The ground between the rails and also the space between the tracks will be asphalted at the expense of the Light and Power company. Manager Campbell estimates the cost of these changes at \$16.000 a block and \$70.000 to Seventh East street. He hopes to have the improvements finished by October 1. The trolley wires will be changed first and it will be only a matter of a few weeks before they will be in commission.

Advacates Incandescents.

Advocates Incandescents. "Some time," said Mr. Campbell, "I hope to hang a 22-candle-power incandescent lamp from each pole, just to show the public what an immense improvement it will be over the present system of arc lights. With such an arrangement Brigham can be made one of the prettlest streets in the world. What is wanted now is diffusion of light. The arcs are brighter, but not nearly so serviceable as the smaller lights at the places where light is needed."

The directors of the company held a

The directors of the company held a meeting vesterday ratified the action taken at the special meeting Monday and adjourned. Mr. Campbell said that the directors have taken no steps toward submitting a new franchise in the place of the one rejected to the City Council.

Main Point Contention.

Main Point Contention.

The main point of contention is over the amended request of County Superintendent John W Smith, asking for \$5,000 instead of \$40,000 for county school purposes. Based on the valuation of property, it would be necessary, to raise the amount asked for by the Superintendent to make the rate 2.5 mills, a raise of three-tenths of a mill over the past year. The amended request of the County Superintendent was not filed in May, as provided by law hence the point is raised that the Commissioners can only consider the original report, which called for \$40,000, and would leave the county school tax rate as it is 2.2 mills. In the payment of this tax the taxpayers of the city put up 75 per cent of the amount and the city gets but 65 per cent of the total in return.

Estimate Salt Lake's Needs.

Estimate Salt Lake's Needs.

The Salt Lake Board of Education ha made estimates on its financial needs for the next school year amounting to \$34,-000, which is \$45,200 more than was asked for last year. This will require the full levy allowed by law 8.2 mills, and still this will not raise the amount requested by more than \$17,000. The rate last year was \$ mills.

For City Purposes.

The City Council, it is stated, probably will make a levy of 12 mills for city pirrposes, an increase of 2 mills over last year. This will make a total increase in the tax rate in the city of 2½ mills, even if no other raises are made and the County Commissioners do not increase the county rate over last year.

Hierarch's Trust Has Another Scheme

Gossip Has It That Light Combine Is Preparing Another Franchise Proposition.

There was considerable gossip about the city and county building yesterday that the Utah Light and Rullway company was prepuring to offer another franchise proposition to the City Council. It was said that the draft of the ordinance would be short, merely enough to corrolldate the several franchises under which the company is now operating and extending them for five years over the life of the longest one, and reducing the price of lights to the rate which went into effect July 1.

Alleged Water Rights.

This would leave out of the consideration the alleged water rights in Fig Cottonwood carryon, but would carry with it substantially the matter of free lights to the city as that plan now exists. It is inferred that this is what was meant by the company's threat, made during the discussions last spring, to "rest on its existing franchises."

Engineer's Office at Sea.

The City Engineer's office is somewhat at sea at this time, in view of the company's rejection of the substitute franchise, as to how to proceed with the plans for the his conduit.
